

Sales Support Engineer:

RF Connect, LLC designs, deploys and supports high performance wireless and mobile solutions. We offer a dynamic entrepreneurial environment that fosters creativity and provides unlimited opportunities for personal and professional growth.

RF Connect is currently looking for a Sales Engineer that will be responsible for providing Account Managers pre-sales, engineering and design support for complex wireless solutions.

Duties and Responsibilities:

- Provide pre-sales support to Account Managers on complex wireless applications and solutions
- Intimate knowledge of Cisco Advanced Wireless products and services
- Access strategic partner intranets to create customer quotes
- Participate in Strategic Partner current and future product offering training
- Assist or create Statements of Work and PowerPoint presentations
- Interact with Strategic Partner Sales and Engineering personnel
- Obtain and maintain industry certifications

Experience and Requirements:

- Two to five years experience in a sales environment or engineering related experience
- Understanding of Cisco wireless, data and services portfolios
- Understanding of Cellular Service provider networks and equipment
- Highly organized, capable of managing multiple tasks with strong organization skills
- Strong written and verbal communication skills
- Initiative and self-motivation
- Skilled at Microsoft Office (Excel, Word, PowerPoint)
- Four year Degree or equivalent in a related discipline

We are offering a highly competitive compensation package for the right candidate.
