

# GREENLIGHT

## CELLULAR SOURCE SOLUTIONS

Carriers are increasingly reluctant to provide a cellular signal source to light up in-building wireless network deployments to meet tenant and occupant “fourth utility” expectations.

**GREENLIGHT solves this problem.**

# GREEN LIGHT

## CELLULAR SOURCE SOLUTIONS

### CELLULAR CAPACITY DELIVERED THROUGH THE CLOUD

---

#### SUPPORTED FEATURES:

- **Carriers:** Major carriers in most markets
  - **Protocols:** 4G for all carriers. 3G and 5G availability by carrier and market
  - **Connectivity:** Cloud-based high-speed backhaul and capacity
  - **Security:** Ultra-secure cellular-based technology
  - **Management:** Service Level Agreements with 24/7 monitoring
- 

#### BENEFITS & ADVANTAGES

- **Predictable Timelines:** 120-day average deployment time
- **Turnkey Deployment:** Coordination and negotiation of licensing
- **Affordability:** Subscription-based OpEx model
- **Simplicity:** Single supplier solution
- **Obsolescence Mitigation:** Technology refresh built-in at renewal intervals

### SMART WIRELESS SOLUTIONS

RF Connect delivers forward-leaning wireless broadband solutions that connect people, devices and buildings to make them more productive, happier and safer. We do this by designing, deploying, managing and operating wireless networks that enable user and public-safety communications and support critical applications and services. As a trusted advisor, we employ a heterogeneous approach that aligns the best technology solutions (including WiFi, 4G, 5G, CBRS, FirstNet and network infrastructure), capital funding and financing, and turnkey managed network services to support the current requirements unique to each client and to anticipate new ones..
